

iScan Air™

Getting Started Guide

Install the iScan Air App

1

Note: Ensure that your device has Internet access via your service provider or wireless connection.

🔍 iScan Air

- Search and install the "iScan Air" App from your device's online stores.
- Once downloaded, the iScan Air app will appear on your device's home screen.

Power on and Connect via Wi-Fi

Note: Ensure that your device is enabled with Wi-Fi mode.

2

- When Scanner is turned on, wait 20 seconds until  indicator blinks.

- Search for "DIRECT-xxxxxx_iScanAir" network. (Note: "xxxxxx" is a 6-digit random code.)
- Input 8-digit password "12345678". (Note:  indicator becomes a steady blue light when connected.)

Insert a document and Scan

Note: iScan Air panel may vary slightly depending on your operating system.

3

- Insert a document into the front of Scanner.

- Press the "Scan" button.

- The document will be passed through the scanner.

View and Save

4

- View real-time image during scanning on your device.

- Press the "Save" button to save the image when scan finished.

- Retrieve the image in your photo folder and share it from your device.
